Which product performs best?

	product	revenue
0	A	100
1	B	200
2	C	150

Run Analysis

Agent Reasoning

Observation: product revenue

0 A 100

1 B 200

2 C 150

Observation: product

B 200

C 150

A 100

Observation: product

B 200

C 150

A 100

Final Report

Product Performance Report

Objective: Identify the product with the highest revenue.

Data Overview: The following data shows the revenue generated by three products (A, B, and C):

Product	Revenue
A	100
B	200
C	150

Analysis:

- Product **B** has the highest revenue of **200**.
- Product **C** follows with a revenue of **150**.
- Product **A** has the lowest revenue at **100**.

Conclusion: Product **B** performs best in terms of revenue generation.

Recommendation: Consider focusing marketing efforts and resources on Product B to maintain or further increase its performance.
